Career Objective

Motivated and detail-oriented Computer Science Engineering student seeking internship opportunities to apply programming, AI/ML, problem-solving, and web development skills while gaining practical industry experience and contributing to innovative technology-driven projects.

Education

Bachelor of Technology (B.Tech) in Computer Science and Engineering
Sri Venkateshwara College of Engineering and Technology, Chittoor

CGPA: 9.21

Technical Skills

- **Programming Languages:** C, C++, Python, Java (OOPs)
- **Core Subjects:** Advanced Data Structures and Algorithms, DBMS, SQL, Operating Systems, Computer Networks
- **Algorithms:** Searching, Sorting, Dynamic Programming, Greedy Algorithms, Backtracking, Graph Algorithms
- **Python Libraries:** NumPy, Pandas, Matplotlib, TensorFlow, Scikit-learn
- **Web Technologies:** HTML, CSS, JavaScript
- **Technologies:** Artificial Intelligence, Machine Learning, Generative AI, deep learning
- **Tools:** Git, GitHub, VS Code, Linux

Internship Experience

Infosys Springboard Virtual Internship – AI/ML

- Worked on Artificial Intelligence and Machine Learning fundamentals including predictive analytics and model evaluation techniques.

projects

External Skin Infection Detection using Generative AI

Python, TensorFlow, ML, deep learning (CNN)

- Developed an AI-powered image analysis system to detect possible external skin infections using deep learning techniques.
- Performed image preprocessing, dataset cleaning, and augmentation techniques to improve prediction accuracy and model performance. Implemented predictive analytics techniques for identifying possible skin-related conditions from uploaded images.
- Improved understanding of healthcare AI systems, deep learning workflows, and computer vision application.

AI-Powered Diagnosis Helping Center

Python, Machine Learning, deep learning

- Built an AI-based healthcare assistance platform to analyze symptoms and provide preliminary recommendations.
- Implemented machine learning algorithms and predictive analytics techniques for healthcare support systems.
- Performed preprocessing, feature extraction, and dataset analysis using Python libraries for improved prediction workflows.

Online Aptitude Test Platform

HTML, CSS, JavaScript

- Developed a responsive web-based aptitude examination platform for conducting online assessments and quizzes.
- Implemented timer-based examinations, automatic score generation, and dynamic result calculation functionalities.
- Created MCQ modules covering logical reasoning, quantitative aptitude, and verbal ability sections.
- Designed responsive and interactive user interfaces using HTML, CSS, and JavaScript technologies.
- Improved front-end development, UI design, and problem-solving skills through practical implementation.

Secure Online Aptitude Examination System

Python, Flask, MySQL, Cybersecurity

- Developed a secure online aptitude examination platform with role-based authentication and encrypted user management.
- Implemented JWT authentication, bcrypt password hashing, and protection against SQL Injection and XSS attacks.
- Built secure exam modules including question randomization, timer-based assessments, answer submission, and automatic result generation.

AI Chatbot using LLM, RAG, LangChain & LangGraph

- Developed an AI-powered chatbot using LLMs, LangChain, and LangGraph.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline with vector embeddings for context-aware responses.
- Integrated prompt engineering, semantic search, and conversation memory to improve answer quality.
- Built using Python, LangChain, LangGraph, ChromaDB/Pinecone, Streamlit, and Git.
