Education

Sri Venkateswara College of Engineering and Technology

Bachelor of Technology in Computer Science and Engineering

Chittoor, Andhra Pradesh

2024 - 2028

- **CGPA:** 9.21/10

Technical Skills

- **Programming Languages:** C, C++, Java, Python, JavaScript, TypeScript
- **Computer Science:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks
- **Web Development:** HTML, CSS, React.js, Next.js, Node.js, Express.js, Flask
- **Databases:** MySQL, PostgreSQL, MongoDB, ChromaDB
- **AI/ML:** Machine Learning, Deep Learning, Generative AI, Retrieval-Augmented Generation (RAG), TensorFlow, Keras, Scikit-learn, Pandas, NumPy
- **AI Tools & Frameworks:** LangChain, LangGraph, Hugging Face, Groq, Large Language Models (LLMs)
- **Developer Tools:** Git, GitHub, VS Code, Linux, Jupyter Notebook

Projects

Issue Tracker – Full-Stack Web Application

Github Next.js, TypeScript, Prisma, MySQL

- Developed a full-stack **issue management application** using **Next.js, TypeScript, Prisma, and MySQL** to create, track, update, and manage software development issues.
- Implemented **CRUD-based issue management** with **issue creation, editing, status tracking, priority management, and structured issue workflows**.
- Built reusable and responsive **React components** with **Next.js and TypeScript** to deliver a structured and user-friendly interface for issue management.
- Integrated **Prisma ORM and MySQL** for database schema management, persistent data storage, and application data operations.
- Applied **Git and GitHub** for version control, source-code management, and maintaining a structured software development workflow.

RAG Chatbot

GitHub Python, LangChain, Groq, Hugging Face, ChromaDB, Flask

- Developed a **Retrieval-Augmented Generation (RAG) chatbot** using **Python and LangChain** to provide context-aware answers to user queries from uploaded documents.
- Built a **document processing and retrieval pipeline** using **PyMuPDF, LangChain, and text chunking** to extract, preprocess, and prepare unstructured documents for retrieval.
- Implemented **Hugging Face embeddings** with **ChromaDB vector database** to enable **semantic search** and retrieval of relevant document content.
- Integrated **Groq LLMs with LangChain** to generate context-aware responses based on retrieved document information within the **RAG pipeline**.
- Developed a **Flask-based chatbot interface** for document-based question answering, connecting document processing, semantic retrieval, and LLM-based response generation.

Internship

Infosys Springboard

AI/ML Virtual Internship

Remote

2025

- Gained practical experience in **Artificial Intelligence and Machine Learning** through project-based learning and technical assignments.
- Worked with **Python, data preprocessing, machine learning algorithms, and model evaluation** to solve practical problems.

Certifications

Infosys Springboard Virtual Internship – AI/ML

- Completed a virtual internship focused on Artificial Intelligence and Machine Learning, gaining practical exposure to machine learning and deep learning concepts.

Wells Fargo Software Engineering Job Simulation

- Completed a software engineering job simulation.
